[Dico Haz Waste Determination Memo 8-30-17 \(1\).pdf](#)

Tonya,

I apologize for being a little late with this. My only significant comment is regarding the "listed hazardous waste" classification of the aldrin contaminated Maintenance Building and Building 4 concrete pads. (see attached "DICO EECA comment"). It now appears there may be alternatives to that approach which the Iowa DNR may support (see attached "Dico Haz Waste Determination Memo") Let me know if you need a hard copy of my comments.

Hylton, find attached the revised EE/CA for the Des Moines TCE site. Although there were quite a few revisions from the previous version, there are no real substantial changes. We are still hoping to get this document out for public comment by the end of the month. I will be out of the office Thursday through Monday, so if you can review and provide me any feedback by COB Monday, August 28<sup>th</sup>, it would be greatly appreciated. I should be sending the revised Final Report later today.
